

AQUASTONE POOLS & LANDSCAPES

EXTREME MAKEOVER

AWARD-WINNING RENOVATIONS

Aquastone Pools & Landscapes has taken this dated kidney-shaped pool, which was clearly showing its age, and transformed it into a modern oasis, perfect for enjoying the enviable waterfront location.

The brief from the owners of this south Sydney home was to bring the pool up-to-date by changing it to a more modern rectangular shape. To achieve this, Aquastone Pools & Landscapes built the new pool shape within the existing shell. This was a challenging task as parts of the old shell had to be completely demolished to make way for the shape of the new pool.

Now measuring 6.3m x 3m, the concrete pool features a luxurious fully-tiled interior, complemented by ceramic tile coping and paving. The interior is highlighted at night by two underwater LED lights. The pool's existing filter, pump and sanitisation system were retained.

This outstanding renovation was recognised at the 2012 Swimming Pool and Spa Alliance Awards of Excellence, winning gold in the Renovations over \$25,000 category.

The accolades continue for Aquastone Pools & Landscapes, with this next project winning gold in the same category in 2013.

The owners of this home wanted a total renovation of their backyard, including the pool and surrounding landscaping. They wanted an inviting and functional space that their family could enjoy every summer.

Aquastone Pools & Landscapes' selection of modern materials has brought the pool up-to-date. The 10m x 4.5m concrete pool has been given a Gemtex turquoise interior, complemented by Himalayan sandstone paving and coping. The coping was custom-cut to create a beautiful curved edge.

The owners of the home wanted their swimming season to be extended for their children, so Aquastone Pools & Landscapes installed both solar and gas heating. A new step was also added inside the pool to make it more child-friendly.

Aquastone Pools & Landscapes was established in 1996 by brothers Scott and Gavin Bazley. As well as award-winning renovations like those pictured here, the company also builds new pools throughout Sydney.
